

To serve you better, we are working on ways to notify you of your appointment and important notifications via email, voicemail, and/or through text messaging. **Please select your preferred method(s):**

Name: _____ Date of Birth: _____

Email _____

Voicemail: (_____) _____ - _____

(If you choose voicemail, the SMS message will begin talking as soon as there is a connection, so if you have a long greeting before someone can leave you a message, you may miss the call. Voicemail does not mean we will leave results, only to check your portal.)

Text Msg: (_____) _____ - _____

This is the option that works best. A message will be sent to remind you to check your patient portal for results or if there is inclement weather and we need to reschedule. It will never send a message regarding your personal health information.

Signature _____ Date _____
